

IT'S SUCH A MYSTERIOUS PLACE

Once upon a time there was a boy called Tom who had a dream. His dream was going to another planet, but his friends told him that that was impossible. He was just a normal guy, in a normal school with a normal life.

One day Tom was going to school when a bus stopped in front of him. In the hood of the bus there was a sign in which it was written:

“No more normal guys!”

Tom has just read this sign when a woman got down from the bus. She told Tom to enter in her school and make his dream come true. Tom didn't know what to answer so the woman gave him a calling-card, so he could call her whenever he wanted to.

That afternoon he was on his bed thinking about what happened that morning, when he remembered that the woman gave him a calling-card so He decided to call her.

Once he called her, she appeared in his room in a magical way. She told him everything he needed to know about her school.

It was a school for teenagers who had big dreams which are difficult to become true.

Tom decided to enter in the S.T.B.D. That was the School for Teenagers who had Big Dreams.

But when Tom entered in the S.T.B.D. He didn't leave his normal school, he went to his normal school in mornings and in afternoons he went to the S.B.T.D.

Tom met there a lot of guys like him who had big dreams.

For five years, he saw other boys and girls being graduated and making their dreams true.

On his graduation he was so nervous, but he was prepared to go to another planet. Now he can tell everyone that they were wrong.

Since that day, he has been traveling around the universe and going to every planet he wants to.

That school taught him that no one can tell you what you can or you can't do. That mysterious place became him a new and a better person.

Now is your turn, go out and find your mysterious place, or maybe you have already found it, if you haven't found it yet then you have to work hard and make your dreams come true.
